Wildix

You never get a second chance to make the first impression…

Welcome your clients in the best way.

So you have to integrate a doorphone into your communication system? Good, integration is one of the top technology trends of today.

However integration creates problems.

Integrating your communication system with video door phones could cause you big problems: codecs compatibility, advanced settings, unexpected reboots, conflicts between different technologies, high implementation costs.

➡ The vendor of the Unified Communication system must be responsible for the compatibility and make sure the system is **indeed unified**

The Solution:

Wildix made sure you can receive the video streaming from your video door phone to the 7" screen of your deskphone - installed onsite, in a remote office, or even at home.

NOTE: The Wildix communication system is available on-premises or in the cloud.

WP600A series

The ultimate deskphone integrated with video door phones

Features:

WP600A series deskphone provides audio and video communication capabilities allowing you to identify the person who is at your door.

- audio and visual monitoring of doors/gates: **increased security**

- two-way audio and video communication with a visitor at your door/gate: **increased reactivity**

- remote control of the door/gate: **increased efficiency**

Why it is different:

- **Cloud system does not require installation of any additional devices at your office**
    - Static IP-Address is not needed

- **Encrypted SIP-TLS connection ensures security**
    - Avoid issues related to SIP ALG on router, bypass firewall and simplify your configuration

CERTIFIED BRANDS*

* Are you using a video door phone of another brand?

Ask the vendor to fill in the form for the integration: **www.wildix.com/integrations**

Integration with Door phones

A door phone becomes an extension of your enterprise PBX, integrated with your deskphone. Once a visitor rings your doorbell, you automatically receive a video streaming from your door phone to your deskphone.

Answer your doorbell even when you're out of office.

You can receive the call and the video streaming from your doorbell to Wildix Collaboration interface on Mac OS X and Windows (use Firefox browser) or directly to your smartphone. This is possible thanks to **Wildix Mobile Apps for iOS and Android** - available on App Store and Google Play **free of charge**.
